NUTRITION TIP FROM THE KSC FITNESS CENTERS--FOOD SAFETY YOU CAN USE: Most of us may not think much about food safety until we get "mysteriously" sick after a picnic lunch or trip to the local buffet. But food safety is not just a concern when others are preparing your food. Check out these food handling tips and see if you practice them at home. If not, its time to develop some new, healthy habits.

- wipe counters before and after cutting up food
- use different cloths when wiping up raw meat juices
- wash hands after cutting meat, fish, or poultry
- wash hands before serving cooked food
- always wash hands before and after touching children or pets
- don't use the same utensils to handle raw and cooked meat items
